React Js

Nodejs ⇒

> **Run JavaScript Everywhere**
> Node.js® is a free, open-source, cross-platform JavaScript runtime environment that lets developers create servers, web apps, command line tools and scripts.

React Js 😇😇

⇒ Nodejs Basic

Run Time ENV
Platform Independent or cross-platform
Cross Browser Compartability
Open Source
Layering Concepts
Js Code Runner anywhere

⇒ ReactJS 👍

⇒ Facebook is First React application

⇒ SPA ⇒ Single Page Application
⇒ MPA ⇒ Multi page APplication

SPA ⇒ Single Page Application	**MPA ⇒ Multi page APplication**
It take part of loading ⇒ doesn't take a entire page loading	**Take entire page loading methods**
Html request will given a Json response	**Html request will given html response**
Doesn't take content changing ⇒ but content swapping action will occur	**Content changing methods**
Ex: gmail ,	**Ex:tcs**

Features or Fundamentals ⇒ Reactjs

1. **VDOM ⇒ Layering of Original layer ⇒ duplicate of real dom**
2. **Component ⇒ Part of code or reusable block code ⇒ 2 class / Function**
3. **JSX ⇒ javascript xml ⇒ combination of js and html**
4. **State ⇒ current data, component, values**
5. **Props ⇒ parameter ⇒ value carrier**
6. **Event Handlers ⇒ js event handler**
7. **One Way data Binding ⇒ one way communication**
8. **Performance ⇒ speed / memory space**
9. **Simplicity ⇒ neat and clear web app**

```
import React from "react";
import Hari from "./Demo2";
function Akash() {
    return (
        <div>
            <h1>hello Hamith
                <Hari />
            </h1>
        </div>
    )
};
export default Akash;
```

```
import React from "react";

const Hari = () => {
    return (

        <div>
            <p>hello teamby hari</p>
        </div>
    )
}

export default Hari;
```

```
import React from "react";

class Vasan extends React.Component {
    render() {
        return (
            <div>
                <h1>hello friend by vasan</h1>
            </div>
        )
    }
}

export default Vasan;
```

```
import React from "react";
function Footer() {
    return (
        <div>
            <ul>
                <li> Limited Privacy NoticeCookie PolicyAccessibility
DeclarationDisclaimerSecurity Policy   California Notice at Collection
</li>
                </ul>
        </div>
    )
}
export default Footer;
```

```
import logo from './logo.svg';
import './App.css';
import Hello from './Hello';
import Vasan from './Demo3';
import Footer from './Footer';
function App() {
  return (
    <div className="App">
      <header className="App-header">
        <img src={logo} className="App-logo" alt="logo" />
        <p>
```

```
          Edit <code>src/App.js</code> and save to reload.
        </p>  hello world ...!....
        <h1>ganapathi raja</h1>
        <a
          className="App-link"
          href="https://reactjs.org"
          target="_blank"
          rel="noopener noreferrer"
        >
          Learn React
        </a>

        <div>
          hello visal
        </div>
        <Hello />
        <Vasan />
      </header>

      <Footer />
      <Footer />
      <Footer />
    </div>
  );
}

export default App;
```
